

I'm not robot!

CEFTRIAXONE (sef try AX one) is a cephalosporin antibiotic. It is used to treat certain kinds of bacterial infections. It will not work for colds, flu, or other viral infections. This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions. COMMON BRAND NAME(S): Ceftrisol Plus, Rocephin What should I tell my health care provider before I take this medicine? They need to know if you have any of these conditions: any chronic illness bowel disease, like colitis both kidney and liver disease high bilirubin level in newborn patients an unusual or allergic reaction to ceftriaxone, other cephalosporin or penicillin antibiotics, foods, dyes, or preservatives pregnant or trying to get pregnant breast-feeding How should I use this medicine? This medicine is injected into a muscle or infused it into a vein. It is usually given in a medical office or clinic. If you are to give this medicine you will be taught how to inject it. Follow instructions carefully. Use your doses at regular intervals. Do not take your medicine more often than directed. Do not skip doses or stop your medicine early even if you feel better. Do not stop taking except on your doctor's advice. Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed. Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once. NOTE: This medicine is only for you. Do not share this medicine with others. What if I miss a dose? If you miss a dose, take it as soon as you can. If it is almost time for your next dose, take only that dose. Do not take double or extra doses. What may interact with this medicine? Do not take this medicine with any of the following medications: This medicine may also interact with the following medications. This list may not describe all possible interactions. Give your health care provider a list of all the medicines, herbs, non-prescription drugs, or dietary supplements you use. Also tell them if you smoke, drink alcohol, or use illegal drugs. Some items may interact with your medicine. What should I watch for while using this medicine? Tell your doctor or health care provider if your symptoms do not improve or if they get worse. This medicine may cause serious skin reactions. They can happen weeks to months after starting the medicine. Contact your health care provider right away if you notice fevers or flu-like symptoms with a rash. The rash may be red or purple and then turn into blisters or peeling of the skin. Or, you might notice a red rash with swelling of the face, lips or lymph nodes in your neck or under your arms. Do not treat diarrhea with over the counter products. Contact your doctor if you have diarrhea that lasts more than 2 days or if it is severe and watery. If you are being treated for a sexually transmitted disease, avoid sexual contact until you have finished your treatment. Having sex can infect your sexual partner. Calcium may bind to this medicine and cause lung or kidney problems. Avoid calcium products while taking this medicine and for 48 hours after taking the last dose of this medicine. Side effects that you should report to your doctor or health care professional as soon as possible: allergic reactions like skin rash, itching or hives, swelling of the face, lips, or tongue breathing problems fever, chills irregular heartbeat pain when passing urine redness, blistering, peeling, or loosening of the skin, including inside the mouth seizures stomach pain, cramps unusual bleeding, bruising unusually weak or tired Side effects that usually do not require medical attention (report to your doctor or health care professional if they continue or are bothersome): diarrhea dizzy, drowsy headache nausea, vomiting pain, swelling, irritation where injected stomach upset sweating This list may not describe all possible side effects. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088. Where should I keep my medicine? Keep out of the reach of children. Store at room temperature below 25 degrees C (77 degrees F). Protect from light. Throw away any unused vials after the expiration date. NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine, talk to your doctor, pharmacist, or health care provider. What Is Ceftriaxone and How Does It Work? Ceftriaxone is used to treat a wide variety of bacterial infections. Ceftriaxone belongs to a class of drugs known as cephalosporin antibiotics. It works by stopping the growth of bacteria. Ceftriaxone is not recommended for use in newborns with high blood bilirubin levels and premature infants due to increased risk of side effects. Ask the doctor or pharmacist for details. Ceftriaxone may also be used before dental procedures in people with certain heart conditions (such as artificial heart valves) to help prevent serious infection of the heart (bacterial endocarditis). Ceftriaxone is available under the following different brand names: Rocephin. What Are Dosages of Ceftriaxone? Dosages of Ceftriaxone: Adult and Pediatric Dosage Forms and Strengths Injectable solution Powder for injection 250 mg 500 mg 1 g 2 g 10 g (adult only) 100 g (adult only) Dosage Considerations – Should be Given as Follows: Intra-abdominal Infections Complicated, mild-to-moderate, community-acquired: 1-2 g/day intravenously (IV) in single daily dose or divided every 12 hours for 4-7 days, in combination with metronidazole Acute Bacterial Otitis Media Adult: 50 mg/kg intramuscularly (IM) once Persistent or treatment failures: 50 mg/kg intravenously/intramuscularly (IV/IM) for 3 days Pediatric: 50 mg/kg IM in single-dose; not to exceed 1 g Pelvic Inflammatory Disease 250 mg intramuscularly (IM) as a single dose with doxycycline, with or without metronidazole for 14 days Septic/toxic Shock (Off-label) 2 g intravenously (IV) once daily; with clindamycin for toxic shock Skin and Soft Necrotizing Infection (Off-label) Due to *Aeromonas hydrophila*: 1-2 g intravenously (IV) once/day in combination with doxycycline Due to *Vibrio vulnificus*: 1 g IV once/day in combination with doxycycline Continue treatment until further debridement is not necessary, the clinical improvement observed, and the patient is afebrile for 48-72 hours Children over 12 years: 1-2 g/day intravenously/intramuscularly (IV/IM) in a single daily dose or divided every 12 hours for 7-14 days, depending on type and severity of infection Severe Acute Bacterial Rhinosinusitis (Off-label) Infection requiring hospitalization: 1-2 g intravenously (IV) every 12-24 hours for 5-7 days Prosthetic Joint Infection 2 g intravenously (IV) every 24 hours for 2-6 weeks; continue treatment until clinical improvement is observed and the patient is afebrile for 48-72 hours Meningitis Adult: 2 g intravenously (IV) every 12 hours for 7-14 days Pediatric: 100 mg/kg/day intravenously/intramuscularly (IV/IM) in single daily dose or divided every 12 hours for 7-14 days; not to exceed 4 g/day Serious Infections Other Than Meningitis, Pediatric 50-75 mg/kg/day intravenously/intramuscularly (IV/IM) divided every 12 hours for 7-14 days Acute Uncomplicated Pyelonephritis 1-2 g intravenously (IV) once/day Surgical Prophylaxis Prophylaxis of surgical infection 1 g intravenously (IV) 0.5-2 hours before the procedure Uncomplicated Gonococcal Infections Adult: Uncomplicated gonococcal infection of pharynx, cervix, urethra, or rectum: ceftriaxone 250 mg intramuscularly (IM) once plus azithromycin 1 g orally once (preferred) or alternatively, doxycycline 100 mg orally every 12 hours for 7 days Centers for Disease Control (CDC) Sexually Transmitted Diseases (STD) guidelines: MMWR Recommendations Rep. June 5, 2015:64(RR3):1-137 Sexual assault Prophylaxis of sexually transmitted diseases (STDs) such as gonorrhea after sexual assault per CDC guidelines includes the following 3-drug regimen: Ceftriaxone 250 mg intramuscularly (IM) once, PLUS Azithromycin 1 g orally once, PLUS Metronidazole or tinidazole 2 g orally once If alcohol has been recently ingested or emergency contraception is provided, metronidazole or tinidazole can be taken by the victim at home rather than as directly observed therapy to avoid drug interactions Pediatric: Neonates Ophthalmia neonatorum: 25-50 mg/kg intravenously/intramuscularly (IV/IM) once; not to exceed 125 mg Disseminated gonococcal infections and gonococcal scalp abscesses: 25-50 mg/kg/day IV/IM in single daily dose for 7 days; if meningitis is documented, treat for 10-14 days Prophylaxis for infants of mothers with gonococcal infection: 25-50 mg/kg IV/IM once; not to exceed 125 mg Children Less than 45 kg with uncomplicated gonococcal vulvovaginitis, cervicitis, urethritis, pharyngitis, or proctitis: 125 mg intramuscularly (IM) once Less than 45 kg with bacteremia or arthritis: 50 mg/kg/day intravenously/intramuscularly (IV/IM) in single daily dose for 7 days; daily dose not to exceed 1 g Greater than 45 kg with bacteremia or arthritis: 50 mg/kg/day IM/IV in single daily dose for 7 days Greater than 45 kg: 1-2 g intravenously (IV) every 12 hours Other Gonococcal Infections (Off-label) Gonococcal conjunctivitis: 1 g intramuscularly (IM) once Disseminated gonococcal infection: 1 g/day intravenously/intramuscularly (IV/IM); continued for at least 24-48 hours after improvement is observed, then continued with cefixime 400 mg orally every 12 hours to complete at least 1 week of therapy Gonococcal endocarditis: 1-2 g intravenously (IV) every 12 hours for 4 weeks Gonococcal meningitis: 1-2 g IV every 12 hours for 10-14 days Acute epididymitis: 250 mg IM once with doxycycline Epiplottis, Pediatric (Off-label) 100 mg/kg/day intravenously (IV) on first day; follow with 50 mg/kg on day 2 or 75 mg/kg once/day for 10-14 days Acute Epididymitis, Pediatric (Off-label) Children over 8 years and greater than 45 kg: 250 mg intramuscularly (IM) once with concomitant doxycycline regimen Dosing Considerations Susceptible organisms Anaerobic cocci, *Bacteroides fragilis*, *Borrelia burgdorferi*, *Clostridium* spp, *Enterobacter* spp, *Escherichia coli*, *Haemophilus influenzae*, *Klebsiella* spp, *Morganella morganii*, *Neisseria gonorrhoeae*, *Neisseria meningitides*, *Proteus mirabilis*, *Providencia rettgeri*, *Pseudomonas* spp, *Serratia* spp, *Staphylococcus aureus*, *Streptococcus pneumoniae*, *Streptococcus pyogenes*
